Secure Webpage Access Method for Unlocking Smart Lockers

Smarter **Storage.**
Better **Workflows.**

Access your locker securely from any device with a simple, browser-based experience.

No apps. No accounts. Just secure, convenient access.

Web-Based
Any device,
any browser

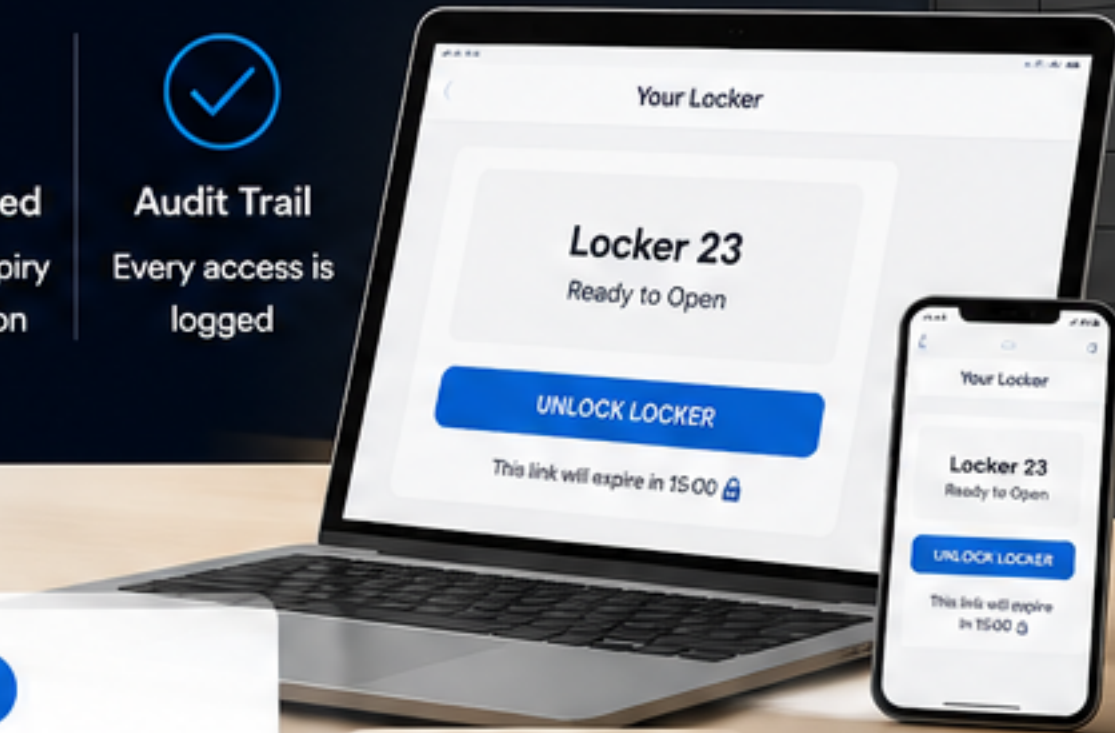

Secure
Encrypted,
private, safe

Time-Limited
Automatic expiry
for protection

Audit Trail
Every access is
logged

HOW IT WORKS

1

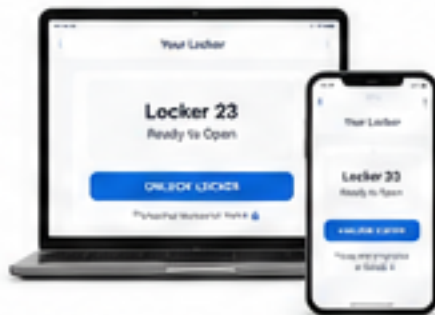

ACCESS LINK RECEIVED

You receive a secure link via email or SMS from the administrator.

2

CLICK THE LINK

Click the secure link to open the locker access webpage.

3

VERIFY ACCESS

The webpage validates your link securely. No login or personal information required.

4

UNLOCK LOCKER

Click "Unlock Locker" and the locker door opens automatically.

5

LINK EXPIRES

The link expires automatically after the set time or after one use. Whichever comes first.

KEY BENEFITS

HIGH SECURITY

Encrypted link with unique token prevents unauthorised access.

TIME-LIMITED PROTECTION

Links expire automatically to eliminate security risk.

ONE-TIME OR MULTI-USE

Configure for single use or multiple uses within a time window.

ANY DEVICE, ANY BROWSER

Works on desktops, tablets and smartphones.

FULL AUDIT TRAIL

Every access attempt and event is recorded for complete visibility.

IDEAL FOR

VISITORS & GUESTS
Provide temporary, secure access.

DELIVERIES & COURIERS
Grant one-time access for drop-off or collection.

CONTRACTORS
Give time-limited access for works or maintenance.

EMPLOYEES
Access shared lockers quickly and securely.

EVENTS & VENUES
Manage short-term storage for attendees.

MULTI-TENANT SPACES
Provide secure access without accounts.

ENTERPRISE-GRADE SECURITY

- ✓ HTTPS Encrypted Connections
- ✓ Unique, Unpredictable Access Tokens
- ✓ IP & Device Validation (optional)
- ✓ Role-Based Access Control
- ✓ GDPR Compliant
- ✓ Full Integration with Vpod Locker Platform

SECURE. SIMPLE. SEAMLESS.

Vpod's Secure Webpage Access Method delivers a frictionless user experience with enterprise-grade security.

RFID CARD ACCESS TO A SMART LOCKER

Tap. Access. Done.

RFID card access provides a fast, secure and convenient way to access smart lockers using contactless technology.

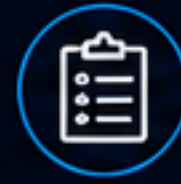

CONTACTLESS
Tap and go access

SECURE
Encrypted and safe

FAST
Access in < 1 second

AUDITABLE
Every access is logged

vpod
SMART LOCKERS

Smarter Storage.
Better Workflows.

HOW IT WORKS

1

CARD ISSUED

Users are issued an RFID card programmed with secure access permissions for their locker or group of lockers.

2

APPROACH LOCKER

The user approaches the locker and presents their RFID card to the reader.

3

CARD VERIFIED

The system verifies the card credentials and permissions in real time.

4

ACCESS GRANTED

Access is granted and the locker door opens automatically.

5

ACCESS LOGGED

The access event is recorded with user, time, locker ID and action for full auditability.

KEY BENEFITS

HIGH SECURITY

Encrypted RFID technology prevents unauthorised access and cloning.

FAST & CONVENIENT

Tap and access in under 1 second. No PINs or passwords to remember.

FLEXIBLE PERMISSIONS

Cards can be assigned to users, roles or time schedules.

FULL AUDIT TRAIL

Every access is logged for complete visibility and accountability.

INTEGRATES SEAMLESSLY

Works with existing access control, HR systems and directory services.

IDEAL FOR

EMPLOYEES

Personal storage, desk sharing, hot desking.

VISITORS

Temporary access for visitors and guests.

DELIVERIES & COURIERS

Secure drop-off and collection management.

HEALTHCARE

Secure medication, equipment and staff storage.

GYMS & LEISURE

Member storage for personal belongings.

EDUCATION

Student and staff lockers across campuses.

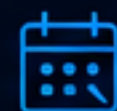

ENTERPRISE-GRADE SECURITY

- ✓ RFID cards use encrypted, secure credentials
- ✓ Supports MIFARE® DESFire® EV1 / EV2 and other secure RFID standards
- ✓ Lost card management and instant deactivation
- ✓ Role-based access control
- ✓ Full integration with Vpod management platform and third-party systems

Secure. Simple. Seamless.

RFID card access makes smart locker use effortless, secure and fully accountable.

SMART LOCKERS

HOW IT WORKS

1

ADD TO GOOGLE WALLET

The user receives an access pass and adds it to Google Wallet on their Android phone or Wear OS device.

2

APPROACH LOCKER

The user approaches the locker and wakes the screen.

3

TAP PHONE (NFC)

The user taps their phone on the NFC reader.

4

ACCESS VERIFIED

The system verifies the digital credential and access is granted.

5

LOCKER UNLOCKS

The locker door unlocks automatically for the user.

6

ACCESS COMPLETE

The user stores or retrieves their item and closes the door. All access is logged.

KEY BENEFITS

CONTACTLESS & CONVENIENT

Just tap your phone – no keys, codes or cards.

FAST & EFFORTLESS

Unlock in under 1 second with NFC technology.

HIGH SECURITY

Uses tokenised, encrypted credentials via Google Wallet.

FULL AUDIT TRAIL

Every access is recorded with time, user, locker ID and action.

WORKS ON ANDROID & WEAR OS

Use your Android phone or Wear OS smartwatch.

EASY TO MANAGE

Passes can be issued, updated or revoked instantly.

ENTERPRISE-GRADE SECURITY

- ✓ NFC secure element & tokenisation
- ✓ Role-based access control
- ✓ Instant pass issuance & revocation
- ✓ GDPR compliant
- ✓ Fully integrated with Vpod platform via API

IDEAL FOR

CORPORATE OFFICES
Employee storage,
IT assets, document
exchange.
